

# 4 YEARS OF 4R SOLUTION IN AFRICA

## WEEKLY SPOTLIGHT:

Canada – Africa Collaboration

## 4R Solution Project Brings Scientists from Canada and Africa Together To Build Science Capacity To Help 80,000 Smallholder Farmers.

- Beginning in 2020, Fertilizer Canada, the University of Manitoba, the OCP group, and University Mohammed VI Polytechnic convened the first Africa-Canada 4R Solution and Precision Nutrient Management online sessions.
- The series of eight Trans-Atlantic webinars brought together key stakeholders in 4R nutrient management research and extension from Canada and Africa to develop a Canada-Africa 4R academic network to support knowledge transfer.
- The sessions identified 4R and precision nutrient management research and extension gaps in Africa, raised the profile of 4Rs in

Africa and Canada, and created an opportunity for future investment in African 4R and precision nutrient management research and extension.

- Presentations and recordings of the webinars are available online at [www.4Rsolution.org](http://www.4Rsolution.org).

Following the virtual meetings, scientists from across Canada and Africa met in person at University Mohammed VI University in Ben Guerir, Morocco, June 14-16, 2023, for a three-day Canada-Africa 4R and Precision Agriculture Workshop.
