

# 4 YEARS OF 4R SOLUTION IN AFRICA

## 4R Training Unlocks Scalable On-Farm Innovation

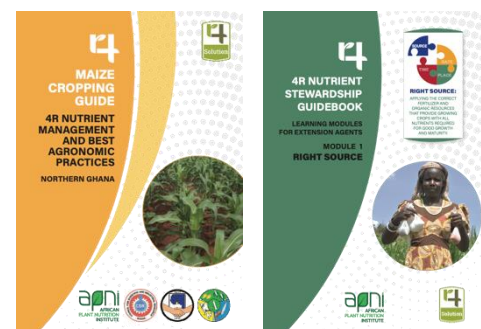

The 4R Solution project supported the development and distribution of a wide spectrum of crop-specific learning tools. Once in the hands of smallholder farmers and their extension agronomists, they provide the field-ready information needed to guide the best use of on-farm fertilizer investments.

*“As smallholders in Senegal, Ghana and Ethiopia became familiar with the principles of 4R Nutrient Stewardship, we saw immediate interest as they thought about how they could adapt the lessons learned about Right Source, Rate, Time, and Place back to their fields.”*

Dr. Samuel Njoroge, APNI Scientist

### Facts on Field Guides & Extension Tools

- **40** individual decision support guides and learning modules delivered as field-ready products and online resources designed to accommodate the breadth of learning styles and needs of farmers and farm advisors.
- Produced in **3** languages (English, French, and Amharic) with

regionalized 4R Packages of Practice to upgrade knowledge for **6** of the most significant food crops in sub-Saharan Africa.

- Training extended to reach **200** extension agronomists in **19** African countries.
